

Unique Features

Humanistic Values / Ren Wen Class

The basic principles of life should be the emphasis of today's education system. Those principles should be instilled in the early stage of children's life. Educating is not only about providing knowledge, but also giving the opportunity to practise a range of daily life skills to instill the basic values of humanistic lifestyle in order to form them into good individuals.

Calligraphy Class (Starting from P5)

Calligraphy is Chinese culture which is to appreciate the beauty of the Chinese characters. In the era of advanced technology requiring fast pace on everything, being calm is one of the hardest things one person can do. Through calligraphy, children are able to learn self control, respect, meditation, and patience.

Tea Ceremony Class

Tea Ceremony class gives students the opportunity to learn not only brewing tea, but also humanities, good behaviour, gratitude, elegant manners, self love, compassion, as well as the Chinese culture integrated within it.

Flower Arrangement Class

Arranging flowers shows strength and beauty of life. Moreover, students learn to develop the inner beauty, elegance, and deportment. Flower arrangement practises the spirit of environmental protection as the materials used are from recycled things/products.

Foundation History

The founder of Tzu Chi Foundation is Master Cheng Yen, a Buddhist nun. Her principles form the heart of our activities and are focused on: cultivating kindness, compassion, joy and selfless giving. Her strong will drives our vision to free all living beings from suffering. In 1966, she established a charity organization to help all people as part of her great mission.

Through Master Cheng Yen's basic principles of sincerity, truth, faith and honesty, the Foundation and its members continue to collect donations, which are fully used for charity missions worldwide. Buddhist teachings and the path of the Dharma serve as guidance for its members on a daily basis.

Over time, Tzu Chi charity organizations have become well known and membership has increased significantly to include people from various backgrounds such as from the middle classes, professionals and various groups in society. As Volunteers, they get to know and enthusiastically help out in Tzu Chi activities. Master Cheng Yen realized that those who are more fortunate financially need an opportunity to donate and complete charity work, while people who are less fortunate need help financially. Both need each other. With the principle to 'save the world through compassion', she implements this into real actions, gathering people with sincere hearts and establishing an organization to cultivate their souls.

In her charity missions, Tzu Chi members never discriminate one from another. In the 50 years since the creation of the Foundation four key missions have been established in charity, health, humanistic culture and education. To these have been added international disaster relief, research and action with bone marrow, environmental friendly activities and community helpers. These are known as the 'eight footprints' and through these small steps are taken to spread great love and compassion across the Tzu Chi world.

Curriculum

Tzu Chi Primary School implements National Curriculum and Cambridge framework infused with Tzu Chi Humanistic Education.

Examinations

At the end of Primary 6, students will take the following examinations/tests:
